Accessing the Event

You have two choices for accessing the event - **website** (computer) or **app** (phone or tablet).

Which one should you choose? Our recommendation is to use both! Both options allow you to create and manage your session agenda, but the app has extra social features that make it easy to interact with other attendees. While watching sessions on your computer, you can use your mobile phone to browse the community board, pose questions to the session facilitators, and other engagement opportunities!
